MACON

THE NOVEL

Macon - the Novel is set in the early 60s against the backdrop of the emerging civil rights movement in the South. A local R and B singer who made the big time is murdered. Officer J.T. Grimes, one of six recently hired black policemen, is first on the crime scene. No-one saw anything or anybody but Grimes knows a black man will be arrested, tried and convicted ... that's how it'd always been.
