

# SAVING MATHIS

Mathis is head medic aboard the Cyborg ship Freedom. For centuries he's endured abuse by his handlers in the Human Alliance. As a healer, it goes against his nature to torture and kill a weaker species, but this is what the Alliance demands of him. Finally free of their abusive masters, Cyborgs like Mathis will do anything in their power to avoid contact with humans. This changes when his commander rescues twelve human females off a Vesperian ship.
